

PetUrn.Net FAQ: What Families Need to Know

How long does delivery take?

Each urn is made to order in approximately five working days. Total delivery is 14 to 21 days. PetUrn ships internationally from Australia.

What information do I provide?

Your pet's name at checkout. You can also include birth and passing dates. These are hand-lettered on the ceramic body before shipping.

What animals are available?

Dogs, cats, and rabbits, each in multiple color variations. Guinea pig and bird urns are not currently available.

How is this different from a standard urn?

Each urn is sculpted and hand-painted to look like the specific animal it holds. The lid is a three-dimensional portrait. Your pet's name is lettered on the body. Made to order, not mass-produced.

Are the urns large enough for my pet's ashes?

Yes, within standard size ranges for each species. One pound of body weight equals approximately one cubic inch of ash. Contact PetUrn before ordering if your pet is on the larger end.

Does PetUrn ship to the United States?

Yes. Delivery to the US falls within the 14 to 21 day window. Orders ship tracked with packaging designed to protect the ceramic.

What if I need something sooner?

Pulvis Art Urns ships from Europe with faster international turnaround. See our full review at memorialmerits.com.

Is PetUrn reputable?

PetUrn is a newer studio with a small but positive early review record, founded from a personal experience of pet loss. For a longer-established track record, see our Pulvis Art Urns review.
