

Memorial Merits is partnered with Discount Caskets. A one-page, honest reference for families considering the Mercury Series Silver Oversized.

## Mercury Series Silver Oversized FAQ

**Ordering online is fast and simple. Everything you need is on this page.**

### **Is 28 inches wide enough?**

Measure shoulders lying flat and add 1 inch. If that total is 27 inches or under, the Mercury fits at a 27 inch interior. Over 28 inches, step up to the Goliath 32.

### **Is 500 pound capacity enough?**

Rated to 500 pounds with transport margin built in. If your loved one is 450 pounds or more, step up to the Goliath 32 for real lifting and handling margin at the service.

### **What does non-sealed mean?**

No rubber gasket between lid and shell. Standard and accepted for most traditional in-ground burials with a vault. Sealed is typically chosen only for religious preference or mausoleum interment.

### **Will we need an oversized vault?**

Yes. Every oversized casket requires an oversized vault, quoted separately by the funeral home. Regional pricing varies, so ask the funeral director up front.

### **Will the funeral home accept it?**

Yes. The FTC Funeral Rule requires every licensed U.S. funeral home to accept a family-provided casket with no handling fee. Discount Caskets hand-delivers directly to the funeral home.

## **Order the Mercury Series Silver Oversized**

Scan the QR code, or tap the link below:
